

# AMİRALİ DANESHVAR

COMPUTER ENGINEERING STUDENT  
SOFTWARE DEVELOPER

## SUMMARY

I am continuing my education as a Computer Engineering student at Istanbul Biruni University. I have experience with programming languages and technologies such as Java, Python, HTML, CSS, JavaScript, and Flutter. I have completed projects in database management with SQL, bot development with Python, and mobile application development with Flutter. During my internship at Yıldız Teknik University, I worked on the design and optimization of WEB APIs. With my problem-solving skills, inclination towards teamwork, and open approach to learning, I aim to advance my career in the fields of artificial intelligence and web development.

## SKILLS

- Programming
- Database
- AI Tools

### Personal Skills:

Problem Solving  
Teamwork  
Leadership  
Creativity

### languages

persian  
turkish  
english

## EDUCATION

**istanbul arel universitesi | 2021 - 2023**  
Engineering-Architecture Faculty

**Istanbul Biruni University | 2024 - Present**  
Engineering-Architecture Faculty

## INTERNSHIP EXPERIENCE

**Yıldız Teknik University | 2025**  
Web API Development Internship

## PROJECT EXPERIENCE

### Hotel Reservation System – Database Project (2024)

A multi-layered database system managing customer reservations, payments, reviews, and special offers. Separate modules for admin and user operations; advanced data management was achieved using triggers and views.

### Email Shield(2025)

Email Shield is a multi-language mobile application that helps users detect phishing emails and protect themselves. Developed with Flutter, this application offers email analysis, password strength checking, a security academy, and customizable settings to enhance digital security.

### Portfolio website

A portfolio website created using HTML, CSS, and JavaScript. This portfolio website includes sections inspired by social media platforms like LinkedIn.
